

A message for your presentation today. Congratulations.
Steve Scherrer.

Honoured Guests, Skating fans, Club members and distinguished members of the community.

Upon hearing the fantastic news the Jordan Skating Club was success in the Trillium Foundation Grant, my thought focused in on how the club contributes to the Quality of Life for so many people in your community. Recreation and in more specific terms skating, allows your community a life long learning opportunity that could only be a success through the passion of your club, dedication of your volunteers who lead your club, and the skilled teaching and service Skate Canada trained coaches provide in teaching the fundamental of the sport, but more importantly the skills for develop skaters into outstanding youth for the future.

The Trillium Fund Grant will provide your club with a number of key elements needed to run and operate successful and engaging programs. From music room equipment to the newest technology that enable effective and efficient use of skating program time, I am sure you will see benefits nearly immediately.

I am sorry I could not be with you to celebrate this today. Celebrate your achievement and coming together as a community, and chart great things for the future for your club, your members and your community.

Well Done!

Sincerely,
Steven Scherrer
